

PRODUCT DESCRIPTION

IMG® Foaming Engine Cleaner safely and effectively cleans all engine bay surfaces, including metal parts, plastic covers and components, rubber hoses and seals, and wiring harnesses.

FEATURES

- Quickly penetrates and dissolves oil, grease, coolant, antifreeze and other common functional fluids
- Easy to use – simply spray onto a cool engine and wash away with water
- Leaves no residue

DIRECTIONS FOR USE

Do NOT apply IMG® Foaming Engine Cleaner to a hot engine.

Use IMG® Foaming Engine Cleaner ONLY in a well-ventilated area.

1. Stop the engine and allow it to cool.
2. Remove the air filter from the engine.
3. Cover the distributor, any exposed wires, and carburetor air inlet. On fuel-injected engines, there is no need to cover the injectors.
4. Shake the can well.
5. Holding the can upright, about 12-24 inches away from the engine, spray IMG® Foaming Engine Cleaner directly onto the cool, dry engine.
6. Allow IMG® Foaming Engine Cleaner to soak into the dirt, grime, and grease deposits for about 10 to 15 minutes.
7. Thoroughly and carefully hose off the engine with water, taking care to avoid electrical components. Allow the engine to dry.
8. Remove coverings from the distributor, wiring, carburetor and distributor and replace any components that were disconnected.
9. Start the engine only after making sure that the cleaner has been completely removed.

Do NOT start the engine until all of the applied IMG® Foaming Engine Cleaner has been properly and completely rinsed from the engine bay.
