

PRODUCT DESCRIPTION

IMG® Airbrake Antifreeze is a specialty fluid designed specifically to ensure efficient and uninterrupted airbrake system performance in cold weather conditions.

Application:

- Methanol-based formula works very quickly.
- Prevents formation of ice crystals in, and freezing of, pneumatic brake system valves and components.
- Dries internal airbrake system components and protects them from rust and corrosion.
- Keeps brake valves clean and slows deterioration of valves and seals
- All-year use is recommended because of the formulation's cleaning and protective benefits.
- Effective at extremely low temperatures, as low as -58°F (-50°C).
- Recommended for use in buses, trucks, heavy machinery, as well as construction, farming, and specialized equipment.

DIRECTIONS FOR USE

Use IMG® Airbrake Antifreeze ONLY in a well-ventilated area.

This product is poisonous and flammable. Ingestion or improper use can cause severe bodily harm or death.

1. Turn off the engine.
2. Remove the filler cap to the evaporator tank of the air brake system.
3. Open the IMG® Airbrake Antifreeze by removing the cap from the bottle.
4. Carefully puncture or remove the seal underneath the cap.
5. Pour the IMG® Airbrake Antifreeze directly into the evaporator tank, until it is about 2/3 full.
6. Replace the evaporator tank filler cap.
7. Turn on the engine. When the compressor starts working, air bubbles should pass through the antifreeze.
8. Make certain that all connections and fittings are in good condition.

COLOR

Clear blue liquid
